Michael Bulmer

Francis Galton: Pioneer of Heredity and Biometry Michael Bulmer

If not for the work of his half cousin Francis Galton, Charles Darwin's evolutionary theory might have met a somewhat different fate. In particular, with no direct evidence of natural selection and no convincing theory of heredity to explain it, Darwin needed a mathematical explanation of variability and heredity. Galton's work in biometry—the application of statistical methods to the biological sciences—laid the foundations for precisely that. This book offers readers a compelling portrait of Galton as the "father of biometry," tracing the development of his ideas and his accomplishments, and placing them in their scientific context.

Though Michael Bulmer introduces readers to the curious facts of Galton's life—as an explorer, as a polymath and member of the Victorian intellectual aristocracy, and as a proponent of eugenics—his chief concern is with Galton's pioneering studies of heredity, in the course of which he invented the statistical tools of regression and correlation. Bulmer describes Galton's early ambitions and experiments—his investigations of problems of evolutionary importance (such as the evolution of gregariousness and the function of sex), and his movement from the development of a physiological theory to a purely statistical theory of heredity, based on the properties of the normal distribution. This work, culminating in the law of ancestral heredity, also put Galton at the heart of the bitter conflict between the "ancestrians" and the "Mendelians" after the rediscovery of Mendelism in 1900. A graceful writer and an expert biometrician, Bulmer details the eventual triumph of biometrical methods in the history of quantitative genetics based on Mendelian principles, which underpins our understanding of evolution today.

From reader reviews:

William Reynolds:

Do you have something that you like such as book? The reserve lovers usually prefer to choose book like comic, limited story and the biggest one is novel. Now, why not attempting Francis Galton: Pioneer of Heredity and Biometry that give your fun preference will be satisfied by reading this book. Reading practice all over the world can be said as the means for people to know world a great deal better than how they react towards the world. It can't be claimed constantly that reading behavior only for the geeky man but for all of you who wants to end up being success person. So , for all of you who want to start examining as your good habit, you are able to pick Francis Galton: Pioneer of Heredity and Biometry become your starter.

Robin Almeida:

In this era globalization it is important to someone to acquire information. The information will make someone to understand the condition of the world. The fitness of the world makes the information quicker to share. You can find a lot of personal references to get information example: internet, newspapers, book, and soon. You will observe that now, a lot of publisher which print many kinds of book. The book that recommended to you personally is Francis Galton: Pioneer of Heredity and Biometry this publication consist a lot of the information with the condition of this world now. This book was represented just how can the world has grown up. The dialect styles that writer use for explain it is easy to understand. The actual writer made some analysis when he makes this book. That is why this book appropriate all of you.

Marilyn Chambers:

You can find this Francis Galton: Pioneer of Heredity and Biometry by go to the bookstore or Mall. Simply viewing or reviewing it can to be your solve problem if you get difficulties for your knowledge. Kinds of this publication are various. Not only by simply written or printed but in addition can you enjoy this book simply by e-book. In the modern era including now, you just looking because of your mobile phone and searching what your problem. Right now, choose your current ways to get more information about your publication. It is most important to arrange yourself to make your knowledge are still revise. Let's try to choose appropriate ways for you.

Kelly Mays:

What is your hobby? Have you heard in which question when you got scholars? We believe that that issue was given by teacher for their students. Many kinds of hobby, Everyone has different hobby. And also you know that little person just like reading or as reading become their hobby. You should know that reading is very important as well as book as to be the factor. Book is important thing to incorporate you knowledge, except your personal teacher or lecturer. You will find good news or update regarding something by book. Numerous books that can you choose to use be your object. One of them is this Francis Galton: Pioneer of Heredity and Biometry.
