The Science of Vehicle Dynamics: Handling, Braking, and Ride of Road and Race Cars Massimo Guiggiani

Vehicle dynamics is often perceived as a quite intuitive subject. As a matter of fact, lots of people are able to drive a car. Nevertheless, without a rigorous mathematical formulation it is very difficult to truly understand the physical phenomena involved in the motion of a road vehicle.

In this book, mathematical models of vehicles are developed, always paying attention to state the relevant assumptions and to provide explanations for each step. This approach allows for a deep, yet simple, analysis of the dynamics of vehicles, without having to resort to foggy concepts. The reader will soon achieve a clear understanding of the subject, which will be of great help both in dealing with the challenges of designing and testing new vehicles and in tackling new research topics.

The book covers handling and performance of both road and race cars. A new approach, called MAP (*Map of Achievable Performance*), is presented and thoroughly discussed. It provides a global and intuitive picture of the handling features of a vehicle. Moreover, the book also deals with several relevant topics in vehicle dynamics that have never been discussed before.

Author's website with **interactive figures** (dimnp.unipi.it/guiggiani-m)

Massimo Guiggiani is professor of Applied Mechanics at the Università di Pisa, where he also teaches Vehicle Dynamics in the MS degree program in Vehicle Engineering.

From reader reviews:

Bruce Jones:

Within other case, little men and women like to read book The Science of Vehicle Dynamics: Handling, Braking, and Ride of Road and Race Cars. You can choose the best book if you want reading a book. Providing we know about how is important a book The Science of Vehicle Dynamics: Handling, Braking, and Ride of Road and Race Cars. You can add understanding and of course you can around the world by the book. Absolutely right, due to the fact from book you can recognize everything! From your country until finally foreign or abroad you will find yourself known. About simple point until wonderful thing it is possible to know that. In this era, we could open a book or searching by internet product. It is called e-book. You can utilize it when you feel bored to go to the library. Let's go through.

Alma Saunders:

This book untitled The Science of Vehicle Dynamics: Handling, Braking, and Ride of Road and Race Cars to be one of several books which best seller in this year, this is because when you read this book you can get a lot of benefit into it. You will easily to buy this specific book in the book retail store or you can order it by way of online. The publisher with this book sells the e-book too. It makes you more readily to read this book, since you can read this book in your Cell phone. So there is no reason for your requirements to past this book from your list.

Dan Morris:

As a pupil exactly feel bored to help reading. If their teacher questioned them to go to the library in order to make summary for some guide, they are complained. Just small students that has reading's heart or real their hobby. They just do what the trainer want, like asked to the library. They go to presently there but nothing reading critically. Any students feel that reading is not important, boring in addition to can't see colorful photographs on there. Yeah, it is to get complicated. Book is very important in your case. As we know that on this period, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. Therefore this The Science of Vehicle Dynamics: Handling, Braking, and Ride of Road and Race Cars can make you sense more interested to read.

William Reyes:

What is your hobby? Have you heard that question when you got scholars? We believe that that query was given by teacher to their students. Many kinds of hobby, Everyone has different hobby. And you know that little person such as reading or as reading become their hobby. You should know that reading is very important as well as book as to be the issue. Book is important thing to incorporate you knowledge, except your personal teacher or lecturer. You discover good news or update about something by book. Numerous books that can you choose to adopt be your object. One of them is The Science of Vehicle Dynamics: Handling, Braking, and Ride of Road and Race Cars.
