Heat Transfer in Food Processing: Recent Developments and Applications S. Yanniotis

Heat transfer is important in food processing, for the hygienic, nutritional and sensory quality of the food product. This book starts with a review of ongoing activities in a broad perspective. Then some specific methods of modeling and analysis are presented. Also topics like freezing and thawing, microwave heating, aseptic processing and modeling approaches for ohmic heating, frying and baking are presented. All topics treated have significant relevance in food processing.
