Spectral Feature Selection for Data Mining (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) Zheng Alan Zhao, Huan Liu

Spectral Feature Selection for Data Mining introduces a novel feature selection technique that establishes a general platform for studying existing feature selection algorithms and developing new algorithms for emerging problems in real-world applications. This technique represents a unified framework for supervised, unsupervised, and semisupervised feature selection.

The book explores the latest research achievements, sheds light on new research directions, and stimulates readers to make the next creative breakthroughs. It presents the intrinsic ideas behind spectral feature selection, its theoretical foundations, its connections to other algorithms, and its use in handling both large-scale data sets and small sample problems. The authors also cover feature selection and feature extraction, including basic concepts, popular existing algorithms, and applications.

A timely introduction to spectral feature selection, this book illustrates the potential of this powerful dimensionality reduction technique in high-dimensional data processing. Readers learn how to use spectral feature selection to solve challenging problems in real-life applications and discover how general feature selection and extraction are connected to spectral feature selection.

From reader reviews:

Patricia White:

Do you have favorite book? Should you have, what is your favorite's book? Book is very important thing for us to learn everything in the world. Each book has different aim or goal; it means that book has different type. Some people experience enjoy to spend their a chance to read a book. They may be reading whatever they consider because their hobby will be reading a book. What about the person who don't like looking at a book? Sometime, man or woman feel need book once they found difficult problem or perhaps exercise. Well, probably you should have this Spectral Feature Selection for Data Mining (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series).

Richard Moyer:

Can you one of the book lovers? If so, do you ever feeling doubt if you find yourself in the book store? Try to pick one book that you find out the inside because don't ascertain book by its cover may doesn't work this is difficult job because you are frightened that the inside maybe not because fantastic as in the outside appear likes. Maybe you answer could be Spectral Feature Selection for Data Mining (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) why because the fantastic cover that make you consider concerning the content will not disappoint you. The inside or content will be fantastic as the outside or cover. Your reading 6th sense will directly assist you to pick up this book.

Donna Feuerstein:

As we know that book is essential thing to add our know-how for everything. By a publication we can know everything we really wish for. A book is a range of written, printed, illustrated or even blank sheet. Every year had been exactly added. This book Spectral Feature Selection for Data Mining (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) was filled with regards to science. Spend your spare time to add your knowledge about your scientific research competence. Some people has distinct feel when they reading a new book. If you know how big good thing about a book, you can sense enjoy to read a e-book. In the modern era like at this point, many ways to get book that you simply wanted.

Melvin Dwyer:

Some people said that they feel weary when they reading a reserve. They are directly felt that when they get a half elements of the book. You can choose the particular book Spectral Feature Selection for Data Mining (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) to make your own personal reading is interesting. Your personal skill of reading talent is developing when you just like reading. Try to choose easy book to make you enjoy to see it and mingle the opinion about book and looking at especially. It is to be initial opinion for you to like to open up a book and study it. Beside that the reserve Spectral Feature Selection for Data Mining (Chapman & Hall/CRC Data Mining and Knowledge Discovery Series) can to be a newly purchased friend when you're experience alone and confuse with the information must you're doing

of this time.
