Night Sky Star Chart (Large Size) 30 - 40 Degrees North Latitude

David Chandler

Night Sky Star Chart (Large Size) 30 - 40 Degrees North Latitude David Chandler

The Night Sky Planisphere is made up of two separate sections. It has a white inner rotating dial marked with the days and months of the year, and a blue outer section marked with the hours of the day. The dial contains a map of the night sky printed with dark stars on a lighter background, which makes reading the chart at night easier. To use the planisphere turn the dial to match the date with the time. The planisphere will then show the stars, constellations, and prominent deep-sky objects that are currently above the horizon as well as the location of the Milky Way. It works for any hour, of any day, of any year. Planispheres are made for use within specific latitude regions. This optimal latitude range for this chart is 30 - 40 degrees north.

Approximate Size = 10 x 9 Inches
