The Hive and the Honey Bee Revisited: An Annotated Update of Langstroth's Classic Roger Hoopingarner

More than 150 years after L.L. Langstroth invented the movable-comb hive and brought beekeeping into the modern age, we can still learn from this historic book. The original book, preserved in its original text and illustrations, is updated and annotated by one of the foremost researchers in apiculture, Dr. Roger Hoopingarner. This book keeps alive, for future generations, beekeeping techniques from the past and offers many lessons for modern beekeepers. Dr. Roger Hoopingarner, Michigan State University Professor Emeritus of Entomology, has specialized in Apiculture for 65 years. His teaching, Cooperative Extension, and research interests in the biology and management of the honey bee include seminal work in pollination of orchard crops. He has been the author, or co-author, of numerous research articles on bee diseases, varroa population dynamics and control, pollination systems, and more.
