The Science on Women and Science Christina Hoff Sommers

Women have achieved or exceeded parity with men in most academic fields but continue to be outnumbered in the physical sciences, engineering, and math. For many equity activists, this imbalance constitutes a serious problem, even a "crisis," necessitating federal oversight to prevent gender bias in higher education and scientific industries. Congress, the Obama administration, and many science and education leaders are considering dramatic measures to improve women's prospects in the sciences. But what if claims of gender bias have been exaggerated?

In 2007, the National Academy of Sciences (NAS) released *Beyond Bias and Barriers: Fulfilling the Promise of Women in Academic Science and Engineering*, an influential study suggesting that women face a hostile environment in the laboratory. The NAS report dismissed the possibility that gender disparities in scientific fields might be attributable to biological differences and called for immediate remedial action in education, government, and business. This volume examines the research behind the NAS's claims and presents a more balanced analysis of the gender gap.

Scientific research on the relationship between gender and vocation is complex, vibrant, and full of reasonable disagreements. Some scholars agree that discrimination is the best explanation for the current configuration of men and women in science, but others, perhaps a majority, suggest that biology and considered preference explain why men and women follow different career paths. *The Science on Women and Science* is a lively, readable, and balanced collection of articles by distinguished scholars from sides of an often-contentious debate.

From reader reviews:

Russell Belcher:

As people who live in often the modest era should be change about what going on or info even knowledge to make all of them keep up with the era which can be always change and advance. Some of you maybe will update themselves by studying books. It is a good choice for you but the problems coming to a person is you don't know what kind you should start with. This The Science on Women and Science is our recommendation to help you keep up with the world. Why, because book serves what you want and want in this era.

Ryan Calhoun:

Nowadays reading books be a little more than want or need but also become a life style. This reading habit give you lot of advantages. The benefits you got of course the knowledge even the information inside the book in which improve your knowledge and information. The data you get based on what kind of book you read, if you want drive more knowledge just go with education books but if you want truly feel happy read one using theme for entertaining such as comic or novel. Often the The Science on Women and Science is kind of e-book which is giving the reader unforeseen experience.

Benjamin King:

This The Science on Women and Science is great reserve for you because the content and that is full of information for you who else always deal with world and have to make decision every minute. This specific book reveal it data accurately using great arrange word or we can declare no rambling sentences in it. So if you are read that hurriedly you can have whole information in it. Doesn't mean it only will give you straight forward sentences but difficult core information with wonderful delivering sentences. Having The Science on Women and Science in your hand like keeping the world in your arm, info in it is not ridiculous a single. We can say that no guide that offer you world within ten or fifteen moment right but this guide already do that. So , this is certainly good reading book. Heya Mr. and Mrs. hectic do you still doubt in which?

Ena Clark:

In this era globalization it is important to someone to receive information. The information will make you to definitely understand the condition of the world. The health of the world makes the information quicker to share. You can find a lot of referrals to get information example: internet, paper, book, and soon. You will observe that now, a lot of publisher this print many kinds of book. Often the book that recommended to you personally is The Science on Women and Science this guide consist a lot of the information on the condition of this world now. This particular book was represented just how can the world has grown up. The language styles that writer use to explain it is easy to understand. Often the writer made some research when he makes this book. This is why this book appropriate all of you.
