**Health Care for Us All: Getting More for Our Investment** Earl L. Grinols, James W. Henderson  
Health Care for Us All challenges the common belief that health care problems in the United States are difficult and possibly insoluble. Americans want to get more for their health care spending, including insurance coverage for all that is personal, portable, and permanent. They want a system that respects incentives for quality care, exhibits a responsible approach to the budget, and is sustainable. Health Care for Us All adopts these five objectives and applies an efficiency filter to identify the virtually unique framework that meets all objectives. Impediments to achieving Americans' goals can be summarized under the rubrics of too little insurance, too little income, and too little properly functioning market. The efficient remedy for each is the subject of the book. Related philosophical as well as economic issues, such as why there should be government involvement in health care, are analyzed.
